

## **Veolia MRF Video Captions**

**00:00 – 00:20**

### **Tipping**

Materials collected from your home or school are tipped into the Materials Recovery Facility.

**00:20 – 00:43**

### **Loading**

Materials are loaded into a bag splitter before the sorting process begins.

**00:43 - 01:02**

### **Disc screens**

Disc screens sort materials of different sizes.

**01:02 - 01:23**

### **Hand sort**

Anything that shouldn't be included is removed by hand.

**01:23 – 01:36**

### **Over band magnet**

Steel cans are attracted onto the magnet.

**01:36 – 01:57**

### **Eddy current**

Eddy current makes aluminium cans jump off the conveyor belt.

**01:57 – 02:10**

### **Lasers and air jets**

Lasers detect plastic items and air jets blow them off the conveyor belt.

**02:10 – 02:28**

### **Bailing**

Sorted materials are squashed into cubes and made into something new.
